EDUCATION

Abu Dhabi University

B.Sc. in Cybersecurity Engineering — CGPA 3.76/4.0

Abu Dhabi, UAE

Expected June 2027

- Dean's List: five consecutive semesters (Fall 2023 – Fall 2025); full undergraduate scholarship, UAE Government ([PROGRAM NAME] — UAE-Ethiopia bilateral)
- Relevant Coursework: [cryptography, network security, digital forensics, algorithms, ...add exact course names]

PUBLICATIONS

AEX-128: A Key-Dependent Finite-State SPN-ARX Hybrid Block Cipher — *IEEE Access*, 2026

- M. Alawida, **M. L. Member** — doi: [10.1109/ACCESS.2026.3730739](https://doi.org/10.1109/ACCESS.2026.3730739)

RESEARCH EXPERIENCE

Undergraduate Researcher, Block Cipher Design

Abu Dhabi, UAE

Abu Dhabi University — Supervisor: Dr. Moatsum Alawida

[START] – 2026

- Co-designed AEX-128, a published 128-bit block cipher combining SPN and ARX rounds under a key-dependent finite-state machine — 3^{10} (59,049) possible execution paths
- Designed the ChaCha-based key schedule: 512-bit state expansion via quarter-round mixing deriving 12 subkeys and per-round FSM transition parameters from key entropy
- Built the Java reference implementation used for the paper's benchmarks — 0.58 μ s/block encryption — and designed the initial diffusion experiments, including the avalanche methodology retained in the published paper
- Co-developed the security evaluation with my supervisor: MILP active-S-box search over all 59,049 FSM paths (36 active S-box minimum), SAC testing with chi-square analysis (94.5% pass at 95% confidence), and NIST SP 800-22 testing at 10^6 -bit scale

TECHNICAL SKILLS

Cryptography & analysis: block cipher design, ChaCha-based key scheduling, avalanche/SAC evaluation, MILP active-S-box analysis (co-developed; deepening independently), NIST SP 800-22

Languages: Java, Python; familiar: C, SQL, JavaScript/React

Tools: Git/GitHub, Linux, automated testing, LightRAG/knowledge-graph retrieval, digital-forensics tooling

PROFESSIONAL EXPERIENCE

Python Developer Intern

Abu Dhabi, UAE

Ansen Technology Co. Ltd. — AI-security company, eThreats threat-intelligence platform

Jun – Aug 2026

- Built the agent skill-rating lifecycle — API contracts, database migrations, rating storage, validation rules, and the “Playbook Keeper” human-review interface — and redesigned guidance delivery to reach specialist agents at the point of tool use
- Improved agent tool-call reliability: traced and fixed the root cause of 94.1% of failed tool calls through a live controlled experiment on production logs, and fixed a caching bug causing redundant calls in 294 of 385 runs — both shipped with regression tests
- Migrated the document-retrieval pipeline to knowledge-graph-enhanced retrieval (LightRAG) behind an adapter layer with zero-downtime shadow ingest — improved answer faithfulness from 86.7% to 100% on a 15-query golden set and reported the ingest/latency trade-offs honestly

Course Assistant & Peer Mentor

Abu Dhabi, UAE

Abu Dhabi University

[YEARS] — 5 semesters

- Delivered 50+ hours of tutoring per semester across undergraduate mathematics, physics, chemistry, and engineering courses — certified for the 50-hour tutoring milestone in five consecutive semesters (250+ hours total)
- Mentored cohorts of ~ 10 first-year students each semester (50+ overall) through their academic and campus transition, recognized with the peer-mentorship certificate each term

PROJECTS

Digital Forensics — NIST Data Leakage Case Study | *forensic tooling, full report*

[github](#)

- Conducted evidence recovery and investigation across the NIST data-leakage case using standard forensic tools; documented findings in a complete investigative report

Farm-Produce Delivery Marketplace | *Java — OOP, concurrency*

[github](#)

- Built an online marketplace connecting farmers and consumers — inheritance/polymorphism design, custom exceptions, interfaces, and multithreaded operation

HONORS & AWARDS

GISEC 2025: 5th place (of 10+ finalist teams), School of Cyber Defense CTF — Dubai Electronic Security Center; qualified 2nd among university teams in round one

Sharjah Voluntary Award: 2024 & 2025 consecutive recipient; 450+ hours of university community service

Certifications: Google Cybersecurity Certificate (2025); IBM Cybersecurity Professional Certificate (2025); Cisco CCNA: Introduction to Networks (2025); Cisco Introduction to Cybersecurity (2024)

Languages: Amharic (native); English (fluent)
